OBJECTIVE

Motivated backend developer with solid skills in Core/Advanced Java, Spring Boot, RESTful APIs, JDBC, and MySQL. Seeking an opportunity to design scalable backend systems, write clean and efficient code, and contribute to high-quality server-side applications.

EDUCATION

B. Tech <i>St. Mary's group of Institutions</i> GPA: 6.5	2021 – 2025 Hyderabad
Higher Secondary Education <i>Sri Chaitanya Junior College</i> Percentage: 89.6%	2019 – 2021 Hyderabad

SKILLS

Programming Languages: Java

Frameworks: Spring Boot | RESTful API | JSON

Databases: MySQL

Tools & IDEs: Eclipse | VS Code | git | Github | Maven

PROJECTS

Hospital Management System

Technologies: Java, Spring Boot, Spring MVC, Spring Data JPA, MySQL, Maven

- Built a hospital management application using **Spring Boot**, covering patient registration, doctor assignment, appointments, and billing.
- Designed a **normalized MySQL database** and implemented secure CRUD operations using **Spring Data JPA**.
- Developed **RESTful APIs** using layered architecture (Controller–Service–Repository) for clean and scalable backend design.
- Implemented for user authentication and role-based access control (Admin, Doctor, Receptionist).

Smart Email Assistant

Technologies: Spring Boot, React, Gemini AI, Extension

- Built an AI-driven email assistant with a **custom browser extension** allowing users to generate summaries, auto-replies, and classify emails directly inside Gmail/Outlook.
- Developed backend in **Spring Boot (REST API)** and frontend in **React**, enabling real-time email analysis and automation.
- Integrated **Gemini AI NLP** for intent detection, priority tagging, sentiment analysis, and smart reply suggestions.
- Implemented secure authentication using **JWT**, email sending via SMTP, and inbox sync through IMAP.
